

For Visitors:

COVID-19 Safety Guidance

WESTERN AREA POWER ADMINISTRATION

As a federal agency, WAPA is required to follow COVID-19 guidance from the Safer Federal Workforce Task Force. We are beginning to open our facilities to meet with customers and other visitors. Please follow these protocols when you are planning to visit a WAPA facility.

Before you arrive:

- Coordinate with your WAPA contact to confirm where you are meeting and which county the facility is located.
- **Three days before** your visit, check the [CDC COVID-19 community level](#) for that county.
 - If the level is medium or high, complete the [OMB Form 3206-0277](#) Certification of Vaccination or take a COVID-19 viral test to show proof of a negative result.
- **Day of visit:**
 - **Bring a mask with you.** Regardless of community level, masks are required in elevators and bathrooms. If you forget a mask, WAPA will provide you one.
 - **Bring the form or negative COVID test if community level is medium or high.**

When you arrive at WAPA's facility:

- Check-in with your WAPA contact and/or security to present your certification of vaccination or negative test result, in addition to following any standard security screening requirements.
- Your contact will escort you and let you know of any additional COVID-related safety protocols. Please follow all safety guidance provided by your contact and signage within the facility.

CDC Community Level	Masking	Proof of Vaccination or Negative Test
HIGH	Required	Required
MEDIUM	Not Required*	Required
LOW	Not Required*	Not Required

*Masks are required in elevators and bathrooms.
